

CELSI

...the future of fire

WELCOME TO CELSI

At Celsi we know how important it is to create a stylish and relaxing living environment. That's why we've developed this collection of premium electric fires.

I believe our success stems from a combination of innovative design, investment in technology and the highest quality manufacturing standards. As a result all Celsi heaters carry a 2 year guarantee to reflect my belief in their quality and durability.

This brochure has been designed to make the purchase of your new Celsi heater as simple as possible. I hope you find it both informative and inspiring.

THERE IS NO MORE VERSATILE FUEL FOR HOME HEATING THAN ELECTRICITY

With a choice ranging from highly chic wall mounted 'hang-on-the-wall' fires, to classically designed hearth mounted fires, there is a Celsi design to suit any home. Best of all you are free to enjoy any of these fantastic heating appliances in any room in your home simply by plugging into the nearest mains socket.

A Celsi electric fire will be the heart of your home all year round. Every fire in the range has a 'flame picture' only setting. Unlike gas or solid fuel fires, this allows you to enjoy an atmospheric glow even when it is too warm to turn on the heat.

If you would like to learn more about the many benefits of owning a Celsi electric fire please sit back and take a few minutes to look through the fantastic range of appliances.

PURAFLAME® RANGE

Combining style with innovation, the Puraflame® range of electric fires is the ultimate in high technology, and gives you the most convincing real fire effect available today.

A Puraflame® electric heater is extremely versatile and creates a breathtaking feature virtually anywhere in your home, from your lounge to your bedroom. Using LCD technology Puraflame® is the only electric fire to give you the astonishing look and sound of a real fire, combined with exceptional functionality. At the touch of a button you can control your room temperature, flame picture, flame speed, volume and brightness. Read more about this amazing functionality on page 4.

Celsi Puraflame® is not just a fireplace. It's an experience.

ELECTRIFLAME® RANGE

Celsi Electrifiame uses advanced 3D technology to create one of the most realistic flame pictures found in any electric fire today.

Relax and enjoy the smoky, soothing flames and be amazed by the depth of the fuel effect. What's more, the high efficiency LED lights used to create the flame picture means that you benefit from low running costs too.

Electrifiame comes with a variable flame dimmer with four settings, and two heat levels, as well as a flame effect only option. All this can be operated via the remote control handset or using the manual controls on the appliance.

ACCENT RANGE

Accent hang-on-the-wall electric fires use ribbon flame technology to create a beautiful flame effect with a comforting under bed glow.

An Accent electric fire can create the perfect atmosphere to suit your mood with optional backlight in a choice of calming blue or vibrant orange glow, and variable flame speed ranging from a gentle wave to a dancing flicker. Take a closer look at the Accent Black Glass, Mirror and Marino fires on pages 24-25.

Accent Mirror	page 24
Accent Marino	page 25

ULTIFLAME RANGE

Ultifiame fires use innovative technology to create an ideal electric heating appliance that combines slim product depth with the appearance of an exceptionally deep fuel bed. The fascinating and highly realistic flame picture is created using LED projection technology to give the look of a full depth fire which can be viewed from any angle. Ultifiame also benefit from a low power flame effect system which consumes 90% less energy than conventional electric fires when on the flame only setting.

The heat output temperature can be adjusted between 0.75kW and 1.5kW and the brightness of the fuel bed glow can be customised too. Every model in this range can be operated by push buttons discretely hidden beneath the canopy of the fire or via the control handset.

CELSI PURAFLAME®
IT'S NOT JUST A FIREPLACE.
IT'S AN EXPERIENCE.

CELSI PURAFLAME® THE MOST FUNCTIONAL ELECTRIC FIRE ON THE MARKET

FLAME PICTURES

Celsi has patented some of the most advanced technologies to create the most sophisticated and realistic fire effect in the world. Every Puraflame fire has been designed to give the appearance of outstanding depth along with an amazing 3D effect, and comes with a selection of real fire effects to choose from.

SMOULDERING LOG
Available on all models

BLAZING LOG
Available on all models

FLAMING COAL
Available on Curved and Panoramic only

GLOWING COAL
Available on Traditional, Rockingham, Essence and Prominence only

FLAME SPEED

You may prefer a slow and calming flame or a quick and spellbinding flicker. With a choice of 5 flame speeds you can speed up or slow down each of the real fire movies.

FIRE VOLUME

There's nothing more soothing than the authentic crackle of a real log fire. Lower the volume for a more subtle result or crank it up for full effect. There is also a mute button to silence the sound effect when you need to. When on 'flame only' setting, Puraflame is the quietest fire on the market.

MOOD LIGHTING

The mood lighting feature creates a calming ambience around the heater. A choice of 3 colours: white, amber and blue, lets you highlight the fire to suit your mood. This is only available on the Curved and Panoramic models and can be turned off if not required.

WHITE

BLUE

AMBER

OFF

PICTURE BRIGHTNESS

Natural daylight or artificial lamplight can have a big impact on how you see the flame picture. We have included this brightness function to allow you the option to increase or dim the screen brightness to suit you and your environment.

SLEEP TIMER

An extremely practical function. The sleep timer can be used to automatically turn the heater to standby mode after a predetermined amount of time. Great if you want to doze off and not worry about turning the fire off once you have fallen asleep. The timer can be set for up to a maximum of 4 hours in 30 minute intervals and once this time has elapsed the appliance will automatically go into standby.

TEMPERATURE

The fan heater can be operated in manual or automatic mode. When in manual mode you can use the heat button on the remote handset to select low heat, high heat or heat off.

To eliminate the hassle of constantly manually adjusting the heat output, every Puraflame fire features a state-of-the-art, digitally controlled thermostat. Use the temperature function to turn on automatic heat mode. You can pre-select your comfort level and the heater will automatically adjust between high heat and off, maintaining the room temperature you have selected.

DISCLAIMER

Our policy is one of constant development and improvement. We therefore reserve the right to revise designs and specifications of our products without formal notice, patents pending. We always recommend our products be viewed in an approved showroom before purchase.

Whilst we have taken every care in the preparation of this brochure it is not intended to replace the installation manual which provides more detailed information.

Photography is for illustration purposes only and although every effort has been made to ensure accurate reproduction of typical installations and flame pictures they may vary according to fire model and flue types.

We accept no liability for any loss or damage arising directly or indirectly from the use of this brochure.

We recommend that all our fires are used in conjunction with central heating and not as a primary source of heat.

In the interests of personal safety a suitable fireguard is recommended when children, the elderly and the infirm are present.

(This brochure is copyright 2012 and must not be reproduced in whole or in any part without prior written permission).

We would like to thank OER Fireplaces (01782 319350) for supplying the fire surrounds used in this brochure.

We are confident you are getting a product that is built to last.

That's why we offer a 2 Year Guarantee on all Celsi electric fires.
