

Dimplex[®]

A world of expertise

2012/2013

The

fires collection

The widest range of electric fires imaginable

choosing your fire

Why Dimplex Electric Fires?

There is nothing quite like a fire – it creates a wonderful feeling of comfort and cosiness. And with a Dimplex electric fire you can enjoy these benefits at the flick of a switch. Installation is also easy with none of the cost and siting constraints associated with flue and gas connections and no need for annual servicing either. All Dimplex electric fires come complete with a fitted plug and many don't even require a fireplace. You simply plug-in and go!*

At Dimplex safety is always a priority too, so all our electric fires have the added reassurance of BEAB approval** which means they have been produced to the most stringent safety requirements for domestic electrical appliances.

With a wide range of traditional and ultra modern designs, we can offer a fire for every living area and every budget. You can also choose from two stunning flame effects – Optiflame® and Opti-myst®.

Optiflame is our original and the world's best selling electric flame effect, while Opti-myst is a fully three-dimensional effect and the world's most realistic electric flame. Please see individual product pages for details of the flame effect fitted to each fire.

A revolution in electric fire technology

Deceptively real, Opti-myst® will captivate you from the moment you see it.

The fully 3-dimensional effect uses established ultrasonic technology

adapted from commercial applications to create an ultra-fine water mist that is illuminated to create the 'flames' and 'smoke'. The result? An effect that surpasses all expectations for realism in an electric fire. See it and believe it!

Scan me now to see the realism of the Opti-myst effect

The Display and Demonstrate range is only available for viewing, demonstration of features and purchase from retailers with showroom premises. For details of where to view and purchase these products, please visit our website, www.dimplex.co.uk/fires and click on the "Where to Buy" section of the individual product pages.

* wall mounted fires require some installation. Opti-myst range requires water to be added
** approved or awaiting approval at time of printing

Wall mounted fires

A stunning range of contemporary designs.

Pages 4-14

Inset fires

A range of contemporary and traditional fires that, subject to model, will inset into fireplace openings, the wall or a suitable fire surround. Many models can also be freestanding using spacer kits.

Page 15-37

Freestanding fires

Five different 'inset' style fires, which can be placed against any flat wall.

Pages 38-41

Electric stoves and basket fire

Impressively authentic, this is a range of modern and traditional stove style fires that can be used almost anywhere. Includes the new basket fire.

Pages 42-51

Suites

A range of traditional and modern surrounds, which includes an integral fire, for a complete fireplace in an instant.

Pages 52-57

Surrounds

A range of four pre-assembled surrounds ready for use with Dimplex electric fires.

Page 58

Radiant fires

A range of traditional radiant fires.

- 'Slot together' construction allows for two different height/depth options*
- Part no. STP001
- Page 48 shows the stove pipe fitted to a fire

the solid fuel fire collection

As the world's largest manufacturer of fires Dimplex understands that there is nothing like a fire to create a focal point in a room and a warm, welcoming atmosphere in the home.

Wood-burning stoves provide an unrivalled combination of characteristics; as well as being highly efficient heating appliances they also offer the mesmerising appearance of real flames and use a sustainable, carbon-neutral source of fuel.

There are significant environmental benefits to using wood as a fuel for heating - wood is considered carbon-neutral because burning logs release into the atmosphere only the carbon that the tree absorbed through photosynthesis while it was growing. Wood is a renewable resource and is often available locally, reducing the need for transportation.

The quality and type of wood burnt greatly affects the performance of a stove; the lower the moisture content of the wood, the higher the potential heat output and the lower the emissions and amount of soot produced. Wood fuel should be untreated hardwood logs that have been cut, split and seasoned for at least twelve months (left to dry somewhere undercover but with free air circulation) or kiln-dried so that the moisture content is less than 20%. Some of the best species of timber for burning are ash and beech. Softwood species, particularly pine and fir, make poor firewood and due to their high resin content quickly create tar-like deposits in the chimney, necessitating frequent sweeping.

The Dimplex range of stoves includes two models that are Defra-exempted for wood-burning in UK Smoke Control Areas. As exempt appliances, the Selborne SE and the Westcott SE can be used in designated Smoke Control Areas in which wood-burning would otherwise be illegal. Locations of Smoke Control Areas can be found on www.uksmokecontrolareas.co.uk

Many of the stoves in the Dimplex range are multi-fuel appliances which means that in addition to burning wood, they can also burn most approved, manufactured smokeless fuels to increase flexibility in fuel supply and in most models, provide increased heat output.

All stove installations should be carried out by suitably qualified individuals and comply with relevant Building Regulations. Dimplex strongly recommends using a HETAS-registered installer; you can find details of your local installers on www.hetas.co.uk or by phoning 0845 634 5626. Many of the fireplace retailers who stock Dimplex stoves have their own HETAS-qualified installation teams and they can advise you on flue requirements and product suitability before purchase.

*10 year warranty on all new Dimplex solid fuel stoves. Terms, conditions and exclusions apply.

See www.dimplex.co.uk/stoves for full details.

After Sales Service

If you require after sales service please visit www.dimplex.co.uk/support

CE Mark

Our products carry the CE mark complying with European safety standards and the European Standard for electro magnetic compatibility.

British Electrotechnical Approvals Board BEAB Approved

The mark of the British Electrotechnical Approvals Board signifies that the appliance bearing it has been produced to the stringent safety requirements for domestic electrical appliances as laid down in BSEN60335.

All Dimplex electric fires are approved by BEAB or awaiting approval at time of printing.

Specifications

Dimplex policy is one of continuous improvement; the Company therefore reserves the right to alter specifications without notice. Although every care has been taken in the reproduction of product finishes in this brochure, the colour photographs and the flame effects should be taken only as a guide. The information contained in this brochure is correct at the time of printing. You are advised to consult your dealer before purchasing.
